Combined Benefits

Digital Bar Tab via AB GO Eats

-The customer scans a QR code at the table or bar.
-Selects "Open Tab" or "Start a Bar Tab"
-The tab remains active for adding drinks or food throughout their visit.

Orders Added via Mobile or POS

-Customers can keep ordering through AB GO Eats (self-service).
-Staff (bartenders or waiters) can also add items through the POS.
-Everything is centralized under a single tab per guest or group.

Minimal Contact, Full Control

-Customers can view their live tab status on their phone.
-They can request the check and pay directly through the app—no need to flag down a server.
-Tips, split payments, or multiple payment methods are supported.

Security and Traceability

-Tabs can be linked to a credit card, phone number, or user profile.
-Reduces errors, improves cash control, and limits bar-side fraud.

Real-World Use Cases

Scenario	Application
Rooftop bar	Guests open their tab by scanning a QR and keep adding drinks from their phone or with staff assistance.
Restaurant with bar	Waiters open a tab via POS; guests add food via AB GO Eats from their table.
Events or after-work	Groups create a shared digital Bar Tab, split the bill from their phones, and receive automated receipts.

Operational Integration

AB GO
Eats

Customer self-service channel
(ordering + tracking + payment).

AB POS
Bar Tab

Centralized control channel for
staff-assisted management.

Both systems sync in real time to
create a smooth, secure, and
frictionless experience.

Conclusion

Combining Bar Tab + AB GO Eats enables you to:

✓ Speed up service without sacrificing personal touch

✓ Increase average ticket size with autonomous ordering

✓ Minimize wait times and order mistakes

✓ Deliver a sleek, modern guest experience with maximum convenience
